**Summer 2020 Geometry Enriched Packet  
(for students entering Geometry Enriched in the Fall)**

The goal of summer math is to ensure that students are prepared for their high school math classes. The skills learned in elementary and middle schools are an integral part of success at the high school level, and this packet covers many of the important concepts for Geometry Enriched.

All students entering Geometry Enriched must complete this summer assignment. You must log onto [deltamath.com](http://deltamath.com) and follow directions below. It is due **September 4, 2020**. Students who complete the assignment by the first day of school will earn extra credit. The Geometry Summer assignment **will not be accepted after September 4, 2020.**

You will receive a grade for this summer packet based on the grade from Deltamath. Be sure to **show all work** while completing the problems. You will need to submit all your work (either in a folder or notebook to your teacher by September 4, 2020). Additionally, all students will be taking a pretest within the first days of school on the information covered in this math packet determined by your teacher.

In your Geometry class, you will be using a calculator often. Therefore, students are encouraged to buy their own **SCIENTIFIC CALCULATOR (not a graphing calculator)**. Students are more efficient using a calculator with which they are familiar with. TI-30 XS (Texas Instrument) is available for in class use only.

**Instructions to access summer assignment:**

1. Log onto [deltamath.com](http://deltamath.com)
2. Click in the upper right hand corner on "Create Account" for Student
3. Use teacher code 254016
4. Add your class from the drop down menu - Geometry Enriched
5. Create account with your name and email
6. Once the account is created, you will see assignments that need to be completed.

For more practice on these skills, use the following internet sources:

[www.purplemath.com](http://www.purplemath.com)
