Minutes:

A meeting was held in the North Providence High School Library with all team members listed. The topic of today's meeting was to review the NPHS School Improvement Plan. Principal Magill explained all five goals, initiatives and proposed action steps. Once complete questions were entertained.

The team members were broken into four small groups to review the plan and assess NPHS' progress at the start of the year. Once groups completed their work, each group was asked to share one area they believe we need to pay attention to as we have not started in this area.

Groups reported that the proposed flex credit was an area we need to begin with pending guidance from RIDE. The other area echoed by all four groups was chronic absenteeism. Principal Magill asked the group if they had any ideas at achieving

this goal. Student representatives were asked to take this idea back to their respective classes to garner ideas at rewarding and incentivizing improved attendance. One group reported that the RULER plan will help in classes to give a snapshot of a student's current state each day.

The group convened and were reminded of the next meeting on October 23.
